

How to buy OPT3

Have your MetaMask wallet ready and funded with MATIC on the polygon network. [Link]. Remember, its a good habit to keep 1-2 MATIC in your wallet to cover gas fees.

In MetaMask, change your network to Polygon chain (MATIC). The easiest way to do this is to visit <https://polygonscan.com>, scroll to the bottom of the page and click the button that says “Add Polygon Network”.

Go to <https://optimus.money/> and click “Buy OPT3” in the top right corner of the screen. This will take you directly to the OPT3/USDT swap page on QuickSwap where you can swap your USDT for OPT3 tokens.

If the swap page doesn't load the OPT3/USDT pair automatically, click “Select a token” and paste the OPT3 token address (below) in the search field.

OPT3 Token Address

0xCf630283E8Ff2e30C29093bC8aa58CADD8613039

Enter an amount of MATIC and click “Swap”, then confirm the transaction in MetaMask. That's it! You're now the proud owner of your very own OPT3 tokens. To see the tokens in your wallet, you will need to import them. In MetaMask, navigate to “Assets” tab and click on “Import tokens”. Paste the OPT3 token address (above) in the first input field. MetaMask will fill the second and third fields with the ticker “OPT3” and decimals “18”. If everything looks right, click “Add Custom Token”. You will now see your OPT3 tokens in MetaMask.

How much will I earn?

You will earn 1% daily returns on any amount of OPT3 tokens that you hold in your wallet. This happens 100% automatically - just sit back and watch your balance grow! You can sell your OPT3 token at any time. No staking. No lockup. No fees. Easy!

Tokenomics

- Fair Launch with 21 Million premixed OPT3 tokens.
- 1% daily rewards distributed to all OPT3 holders equally.
- Optimus buys and burns tokens to create price stability.
- Optimus owns 100% of its own liquidity.

Fees (there aren't any)

Its that simple, we don't need fees or bogus referral schemes to make a product that works. We trust in our results to grow. Optimus is fair, organic and driven to achieve good things for our community.

Roadmap

The roadmap is currently a work in progress. We are listening to input and feedback from the community as we take Optimus all the way to the top; together.

- Create deeper liquidity generating swap fees
- Listing wOPT on known centralized exchanges
- Bonding mechanism
- Expansion into gamefi via new NFT ecosystem
- Team development & strategic acquisitions
- Optimus V3 (multichain here we come)

These are exciting times! Keep an eye on this space as there is much more to follow!!! The roadmap will be updated as we go.

Team

Optimus was born out of the desire to do something good for the defi community. Russty's vision and mastery of algorithmic bot trading put together with dev Delicious Tuna's knowledge of smart contracts have helped us take Defidude's original idea to make the power of bot trading available to everyone and evolve it into something much greater.

With the support of our community, we will continue to develop Optimus and build it into something truly epic. We are currently searching for new people to join the team and be a part of our journey from the very beginning. If you think you can contribute, please reach out to us in the OPTIMUS OFFICIAL telegram chat.
